Goopy Fun!

Children love goopy textures, and while they're playing they're also developing fine motor skills (*be sure to supervise both the making of and playing with any of these materials*).

Washable window paint

Supplies:

- Tempera paint (powdered or pre-mixed)
- Clear dishwashing liquid

Mix powdered paint with dish soap until it's as thick as house paint. Or mix pre-mixed tempera paint with a little dish soap. Put tape around the window's edges, and spread out newspapers to protect the area. Just wipe away paint with a dry paper towel when you're done!
